12 il il TLRC - pseud - ab 28-29h

0 Time

9 days: inc.

BLRC only

Black shells and Black sesames

BLRC + healthy person's WC

Living BLRC

BLRCに健康な人の白血球を加えるとBLRCの寿命が延長します

FIG. 4

205710" 32054007

<21 days incubate > LLRbc Lower Layer Red Blood Cell LWBC Living White Blood Cells FWBC Frozen White Blood Cells

LLRBC only LLRbc + LWBC LLRbc + FWBC

FIG. 5

Newly discovered function of leucocyte

20 days incubation of fat tissue

fat tissue only

fat tissue + FWC (Frozen white blood cell)

脂肪組織に冷凍白血球を加えても、脂肪組織は小さな水溶性の物質に分解します

20 days incubation of muscle tissue

muscle tissue only

muscle tissue + FWC
(Frozen white blood cell)

筋肉組織に冷凍白血球を加えても、筋肉組織は小さな水溶性の物質に分解します

FIG. 6

Dialysis

ULRBC and LLRBC (♀, 52y) in incubator

<4 days after>
